Calendar Year 2023 Monitoring Schedule
Mailing Address: 183 CREE CT LYONS, CO 80540

Public Water System ID	Water System Name	Federal System Type	State Source Type	Service Connections	Population
CO0135610	PINEWOOD SPRINGS WD	Community	Surface Water	298	745
Primary County	**Minimum Certification for Treatment Operator**	**Minimum Certification for Distribution System Operator**	**Last Inspection**	**Seasonal**	**Water Hauler**
LARIMER	C	2	05/18/2022	No	No

Contact Information

All public water systems are required to maintain an Administrative Contact, Treatment Operator (if applicable), Distribution System Operator (if applicable), and Owner. If the information below is incorrect or blank please send us a contact update form. This form and operator certification information is available by visiting wqcdcompliance.com/forms.

Administrative Contact	Treatment Operator	Distribution System Operator	Owner
GABRIELE BENSON	ROBERT LONGWORTH	ROBERT LONGWORTH	PINEWOOD SPRINGS WD

General Information

Samples must be collected at the location specified in the Monitoring Plan or Record of Approved Waterworks.

- Schedules are updated every Wednesday evening. Please contact your specialist with questions wqcdcompliance.com or call us at 303-692-3556.
- **Use Online Water System Search to view system info, online records, contacts, violations, and sample results.**
- Laboratory sample results must be analyzed by a certified laboratory using a certified method. **The requirements listed below are the minumum. Additional sample results (i.e. any and all) collected at a compliance sampling location and analyzed by a certified laboratory using a certified method must be submitted using the Online Portal wqcdcompliance.com/login, fax, or mail.**
- Please identify the **Facility ID and Sample Point ID** (listed below) when submitting sample results. Facility and Sample Point IDs are used to identify general sample site locations.
- All systems on a **3 year Lead and Copper** schedule must sample during the **calendar year and months specified** in the 'Lead and Copper Sample Schedule' under the 'Distribution System Sample Schedules' section.

Monitoring Information

Distribution System Sample Schedules

Facility ID	Facility Name	Facility Type
DS001	DISTRIBUTION SYSTEM	Distribution System

Microorganisms and Disinfectants

TOTAL COLIFORM BACTERIA (TCR) Sample Schedule:

3 sample(s) **per Month** during the collection period

Collection Period:

January 1, 2023 to December 31, 2023

Use the Facility ID and Sample Point ID listed at the end of this monitoring schedule.

FREE CHLORINE Sample Schedule:

Measure **every time** you collect a TOTAL COLIFORM BACTERIA (TCR) sample

Distribution System Sample Schedules

Facility ID	Facility Name	Facility Type
DS001	DISTRIBUTION SYSTEM	Distribution System

Disinfection Byproducts

TTHMs and HAA5s (Stage 2) Sample Schedule:

1 dual sample(s) **per sample point** for a **TOTAL of 1 dual sample(s) per Quarter** during the collection period

****Collection Restriction:*** Sample(s) must be collected, **at a minimum**, in the following months: **February , May , August (Peak Month), November***

State Sample Point ID(s) (System Location ID(s)):
DBP001 (SP4)

Collection Period:

January 1, 2023 to December 31, 2023

Compliance Check:
~~**February**~~ ****Result(s) Received****
~~**May**~~ ****Result(s) Received****
August (Peak Month)
November

Lead and Copper

LEAD AND COPPER Sample Schedule:

10 sample(s) **must be collected every 3 Years**

****Collection Restriction:*** Sample(s) **must be collected between June 1, 2024 and September 30, 2024***

Collection Period:

June 1, 2024 to September 30, 2024

SAMPLES MUST BE COLLECTED FROM THE HIGHEST RISK SITES LISTED IN THE LEAD AND COPPER SAMPLE POOL INFORMATION AT THE END OF THIS MONITORING SCHEDULE.

Each sample must be reported with a State Assigned Sample Point ID (LCR###).

To ensure timely processing of results, please have the certified lab report all results electronically in CSV data format. Do NOT submit paper or PDF copies of lab reported data.

Non-Distribution System Sample Schedules

Facility ID	Facility Name	Facility Type	Sample Point ID	Sample Point Name	Sample Point Type
001	PINEWOOD SPRINGS SWTP01	Treatment Plant	001	FINISHED TURBIDITY	Water System Facility

Daily Schedules

TURBIDITY (CFE) Sample Schedule:

1 sample **every 4 Hours** during the collection period

Note: Sample(s) collected at a location representative of the combined filtered water

Collection Period:

While Operating

Facility ID	Facility Name	Facility Type	Sample Point ID	Sample Point Name	Sample Point Type
040	CLEARWELL FOR CT AND PUMP CHAMBER	Treatment Plant	040	ENTRY POINT	Entry Point

Daily Schedules

FREE CHLORINE (MICROBIAL INACTIVATION AND ENTRY POINT RESIDUAL) Sample Schedule:

2 sample(s) **per Day** during the collection period

Collection Period:

While Operating

Non-Distribution System Sample Schedules

Facility ID	Facility Name	Facility Type	Sample Point ID	Sample Point Name	Sample Point Type
040	CLEARWELL FOR CT AND PUMP CHAMBER	Treatment Plant	040	ENTRY POINT	Entry Point

Quarterly Schedules

2,4-D Sample Schedule:

1 sample(s) **per Quarter** during the collection period

Collection Period:

January 1, 2023 to December 31, 2023

Compliance Check:
~~**1st Quarter**~~ ****Result(s) Received****
~~**2nd Quarter**~~ ****Result(s) Received****
3rd Quarter
4th Quarter

DALAPON Sample Schedule:

1 sample(s) **per Quarter** during the collection period

Collection Period:

January 1, 2023 to December 31, 2023

Compliance Check:
~~**1st Quarter**~~ ****Result(s) Received****
~~**2nd Quarter**~~ ****Result(s) Received****
3rd Quarter
4th Quarter

HEXACHLOROCYCLOPENTADIENE Sample Schedule:

1 sample(s) **per Quarter** during the collection period

Collection Period:

January 1, 2023 to December 31, 2023

Compliance Check:
~~**1st Quarter**~~ ****Result(s) Received****
~~**2nd Quarter**~~ ****Result(s) Received****
3rd Quarter
4th Quarter

Yearly Schedules

NITRATE Sample Schedule:

1 sample(s) **per Year**

Collection Period:

January 1, 2023 to December 31, 2023

3 Year Schedules

SYNTHETIC ORGANICS GROUP Sample Schedule:

1 sample(s) **per 3 Years**

Collection Period:

January 1, 2023 to December 31, 2025

Satisfied Schedules

FLUORIDE Sample Schedule:

1 sample(s) **per Year**

Collection Period:

~~January 1, 2023 to December 31, 2023~~
****Sample Result(s) Received****

INORGANICS GROUP Sample Schedule:

1 sample(s) **per Year**

Collection Period:

~~January 1, 2023 to December 31, 2023~~
****Sample Result(s) Received****

VOLATILE ORGANICS GROUP Sample Schedule:

1 sample(s) **per Year**

Collection Period:

~~January 1, 2023 to December 31, 2023~~
****Sample Result(s) Received****

Non-Distribution System Sample Schedules

Facility ID	Facility Name	Facility Type	Sample Point ID	Sample Point Name	Sample Point Type
040	CLEARWELL FOR CT AND PUMP CHAMBER	Treatment Plant	040	ENTRY POINT	Entry Point

Satisfied Schedules

COMBINED URANIUM Sample Schedule: 1 sample(s) **per 6 Years**	**Collection Period:** ~~January 1, 2020 to December 31, 2025~~ ****Sample Result(s) Received****
GROSS ALPHA, WITHOUT RADON & URANIUM Sample Schedule: 1 sample(s) **per 6 Years** ****Collection Restriction:*** Sample(s) **must** be collected at the **same time** as the COMBINED URANIUM sample(s)*	***Collection Period:*** ~~January 1, 2020 to December 31, 2025~~ ****Sample Result(s) Received****
COMBINED RADIUM (-226 & -228) Sample Schedule: 1 sample(s) **per 9 Years**	**Collection Period:** ~~January 1, 2020 to December 31, 2028~~ ****Sample Result(s) Received****
NITRITE Sample Schedule: 1 sample(s) **per 9 Years**	**Collection Period:** ~~January 1, 2020 to December 31, 2028~~ ****Sample Result(s) Received****

Backflow Prevention and Cross-connection Control (BPCCC) Reminders:

- Annual BPCCC Reports need to be completed by May 1, 2023 for activities completed in 2022.
- The required survey compliance ratio is 1.0, unless you have a CDPHE approved alternate ratio.
- The required assembly testing ratio is 0.90 and the required method inspection ratio is 0.90.
- All assemblies and methods not tested/inspected in 2022 must be tested/inspected within 90 days of the active date in 2023. The active date is the first day that water flows through the assembly or method.
- Annual BPCCC reports should only be submitted to us if a violation occurred. Reports and supporting calculations will be reviewed during your next sanitary survey, however, we can request this information at any time.
- For more information regarding the requirements and how to compile a report please visit wqcdcompliance.com/forms or submit specific questions to cdphe_wqcd_fss_questions@state.co.us.

Storage Tank Reminders:

All storage tanks within the distribution system must be inspected twice per year unless an alternative storage tank inspection schedule has been established and included in the written inspection plan. An alternative storage tank inspection schedule is subject to our review and revision, generally during a sanitary survey, but alternative inspection schedules can be requested by us at any time.

All storage tanks within the distribution system are required to undergo a comprehensive tank inspection at least every five calendar years. For example, if a storage tank last had a comprehensive inspection in 2018, the next comprehensive inspection would be due by the end of 2023

Lead and Copper Sample Pool Information

The supplier must collect lead and copper samples from different **Department - approved** sample sites below until the minimum number of samples required is collected. Contact your compliance specialist if there are questions about unapproved sites. The supplier can add, manage, or inactivate unavailable sample sites on the Data Portal at wqcdcompliance.com/login under My…Sample Sites. Sites have been grouped by sampling priority based on tier level:

- If present, **Tier 1** sites must be sampled unless reported as an unavailable high risk site.
- If present, **Tier 2** sites must only be sampled after all Tier 1 sites have been sampled or have been reported as an unavailable high risk site.
- If present, **Tier 3** sites must only be sampled after all Tier 1 and 2 sites have been sampled or have been reported as an unavailable high risk site.
- If present, **Non-Tier, Representative** sites must only be sampled after all Tier 1, 2, and 3 sites have been sampled or have been reported as an unavailable high risk site.

Unavailable high risk site reporting form is available at wqcdcompliance.com/lcr

COLORADO
Department of Public Health & Environment

APPENDIX A: Backflow Prevention and Cross-connection Control

<<Pinewood Springs Water District Co0135610>> BPCCC Program

Purpose

This Backflow Prevention and Cross-connection Control Program outlines how the supplier of water specified below will implement its written BPCCC program and achieve compliance with Regulation 11.

Other potentially applicable backflow prevention and cross-connection control requirements are specified in Article 1-114 and Article 1-114.1 of Title 25 of the Colorado Revised Statutes and in the Colorado Plumbing Code. The department has developed Safe Drinking Water Program Policy 7 to assist public water systems achieve compliance with Regulation 11.

Public Water System Name & PWSID:	Pinewood Springs Water District. Co0135610
Public Water System Owner:	Pinewood Springs Water District.
BPCCC Administrative Contact:	Robert Longworth
Address:	183 Cree Ct.
	Lyons Co. 80540
Email:	pswdorc@gmail.com
Phone:	303-823-5926

Signatures of Owner or Administrative Contact:

Effective Date	Name	Signature
8/24/22	Robert Longworth	*Robert Longworth*

This BPCCC program will include and specify information regarding how this supplier identifies cross connections, performs surveys, and controls identified cross connections. This BPCCC program also address how this supplier will require that backflow prevention assemblies and methods be tested and inspected annually, how this supplier will track the installation, maintenance, and testing of assemblies and methods and how this supplier will ensure that assemblies are tested by a *Certified Cross-Connection control Technician(Regulation 11.37(1)(b)*.

****This program must be kept on file for review by the department. It can be revised by the department as necessary.

Water Quality Control Division

4300 Cherry Creek Drive South Denver, Colorado 80246

Backflow Prevention and Cross-connection Control Program

(i) Process for conducting surveys.

Visual inspections, on site surveys.

(ii) Legal authority to perform a survey of a customer's property to determine whether a cross connection is present unless the supplier controls all non-single-family residential connections to the public water system with the most protective backflow prevention assembly or backflow prevention method.

{ } Ordinance (attach copy) {x } User Agreements (attach copy) { } Other – explain below

Please see Pinewood springs water districts website,
https://pwswd.com/documents/

(iii) Process to select a backflow prevention assembly or backflow prevention method to control a cross connection.

Current plumbing code and state regulations.

(iv) Legal authorities to install, maintain, test, and inspect backflow prevention assemblies and/or backflow prevention methods and/or require customers to install, maintain, test, and inspect backflow prevention assemblies and/or backflow prevention methods.

{ } Ordinance (attach copy) {x } User Agreements (attach copy) { } Other – explain below

Please see PSWD user agreement on linked website.
https://pwswd.com/documents/

(v) Process to track the installation, maintenance, testing, and inspection of all backflow prevention assemblies and backflow prevention methods used to control cross connections.

Visual and verified inspections by certified personnel.

(vi) The process the supplier will use to ensure backflow prevention assemblies are tested by a Certified Cross-Connection Control Technician.

Annual inspection of records and/ or inspection of equipment.

Backflow Prevention and Cross-connection Control Program

Department Notification

If we become aware of a suspected or confirmed backflow contamination event, the supplier must notify and consult with the department on any appropriate corrective measures no later than 24 hours after learning of the backflow contamination event. The notification should be made to the **24-hour Environmental Release and Incident Report Hotline at 1-877-518-5608.**

When reporting the event, please have available the as much of the following information as possible:

- Date and time of event;
- Location of event;
- Type of threat or event;
- Public Water System Name and Identification Number;
- Water supplier contact name and phone number;
- Method of discovery (consumer complaint, witness, perpetrator, employee report);
- Response actions taken (water quality parameter testing, isolation of affected water);
- Recovery actions taken;
- Notifications made (customers, law enforcement, news media, etc.);
- Assessment of threat, if possible.

Regulation 11.39(7) requires that we notify the department within 48 hours in any instance the supplier becomes aware of any backflow prevention and cross-connection control violation and any backflow prevention and cross-connection control treatment technique violation specified in Regulation 11.39(6).

Such notifications to the department can be written, verbal, or made by other means. The department can be notified via telephone at 303.692.2000 and contacting the department's Water Quality Control Division's backflow prevention and cross connection control specialist. The department can also be notified via the Drinking Water Portal sent to the attention of the backflow prevention and cross-connection control specialist. The Drinking Water Porta can be found online at: https://wqcdcompliance.com/login

Public Notice Requirements

Regulation 11.39(7) requires that suppliers distribute Tier 2 public notice as specified in Regulation 11.33 in any instance the supplier becomes aware of any backflow prevention and cross-connection control treatment technique violation.

Regulation 11.39(7) requires that suppliers distribute Tier 3 public notice as specified in Regulation 11.33 a in any instance the supplier becomes aware of any backflow prevention and cross-connection control violation.

Please contact your department assigned compliance officer with any questions regarding public notice.

Backflow Prevention and Cross-connection Control Program

(i) Survey Process and Documentation

Suppliers must survey all non-single-family-residential connections to the public water system to determine if the connection is a cross connection. The supplier must also survey all connections within the supplier's waterworks to determine if there are any cross connections present which could contaminate the public water systems or the facilities water supply system.

The supplier must identify the total number of non-single-family-residential connections to the public water system and connections within the supplier's waterworks. This number is the total number of connections to the public water distribution system that are not considered single – family connections. Acceptable survey process documentation includes the following: How the supplier will select service connections that need a survey; For example: Usage type - commercial, industrial, or multi-family; new or newly acquired connections; and/or questionnaire results.

Single-family means:

- A single dwelling which is occupied by a single family and is supplied by a separate service line;
- A single dwelling comprised of multiple living units where each living unit is supplied by a separate service line.
- If a water supplier has ownership and maintenance responsibilities of a service line up to a point of single-connections such connections may be considered a single-family-residential-connection even if this connection is to a multi-family dwelling unit. It is important to be aware that all other applicable parts of Regulation 11 will also apply to those new acquired waterworks (i.e. distribution system) and that any irrigation or other cross connections that are directly connected to the newly acquired service line would have to be controlled in accordance with Regulation 11.39.

Once the supplier has identified the total number of non-single family residential connections, the supplier must survey the connections to identify cross connections. The supplier must document the process for conducting surveys. Surveys can be performed onsite by a person designated by public water system or can be of a questionnaire type. The supplier's survey process should identify potential service connections and uses that when identified may trigger cross-connection control requirements. The supplier's process should address how the supplier will select individuals to perform the survey including experience and/or training or certification qualifications to perform a survey. Additionally the supplier must survey any waterworks and water supply systems associated with those facilities for cross connections.

If the supplier uses questionnaires, various methods may be used to distribute the questionnaires: email surveys, web-based surveys, written surveys, or telephone surveys. Questionnaires should provide examples of common cross connections to the customer who completes the survey. Questionnaires should ask that the property-owner indicate that the information is accurate to the best of their knowledge. If the supplier does not receive a response to a questionnaire or the results are inconclusive, the supplier is required to perform an onsite survey for cross connections or control the connection with the most protective backflow prevention assembly or method.

The results of surveys should be kept in a manner that allows the supplier to demonstrate that a survey has been performed and if any action was required based on the results of the survey.

It is important that newly constructed and renovated buildings are constructed in accordance with the local plumbing code. The code is intended to protect the internal potable water system and its occupants from contamination that can be introduced via restrooms, kitchens, boilers, irrigation, HVAC systems, etc. It is equally important that the water supplier protect their distribution system from

contamination that can be introduced via car washes, auxiliary water sources, fire suppression systems, irrigation and many other sources. Water suppliers need to perform cross connection identification surveys to identify potential cross connections within their distribution system.

***Note to supplier. Describe in this section how the supplier complies with the regulation and its survey requirements

(ii & iv) Legal Authority

The supplier must have a legally-enforceable mechanism that implements its written backflow prevention and cross connection control program as described in 11.39(2). The department recommends that the legally-enforceable mechanisms include specific provisions identifying customer requirements under 11.39(2)(a)(ii, iv) and the associated remedies that the supplier may utilize for failure of customer(s) to comply. If the supplier does not have a legally-enforceable mechanism in place, the department expects the supplier to perform the actions necessary to complete the indicated requirements in the regulation.

***Note to supplier. Provide a copy of the ordinance or user agreement in this section or discuss how the supplier implements the actions necessary to complete the indicated requirements in the regulation. As a reminder suppliers are prohibited from installing or permitting any uncontrolled cross connection to the distribution system or within the supplier's waterworks.

- Installing an uncontrolled cross connection means modifications or additions to waterworks or water supply systems that create a cross connection. The supplier is prohibited from intentionally performing any actions which would result in the creation of a cross connection.
- Permitting an uncontrolled cross connection in the context of Regulation 11.39 means the supplier has allowed their users or customers to continue to have an uncontrolled cross connection past the regulatory-defined timelines. If the regulatory-defined timelines have elapsed and the supplier has not taken any of the following actions; control the cross connection, remove the cross connection or suspends service to the identified connection***, then the supplier is allowing, or permitting, the cross connection to exist and is in violation of Regulation 11.

  *** Note to supplier. Before suspension of service can be considered appropriate action the department expects that the supplier will confirm the following:

- The connection downstream of the valve used to suspend the service does not remain pressurized because the customer has access to an alternative source of water or a storage tank onsite
- If the cross connection is to a fire suppression system; suspension of service would not result in the building being inadequately protected from loss of life through fire. If there are service connections at the property separate from the fire suppression system causing the cross connection, a supplier may suspend service to one or all of those other service lines (e.g. domestic or irrigation) as an appropriate action.

- The supplier may receive a department approved alternative compliance schedule for identified cross connections that have not been controlled within 120 days. Department-approval of an alternative compliance schedule means either an email or other written communication from the department. The department has provided in APPENDIX C – BPCCC Rule 120-Day Cross-connection Control Extension Application for such request.

- Suppliers must specify the process that the water system will use to require the installation, maintenance, testing, and inspection of all backflow prevention assemblies and backflow prevention methods used to control cross connections. Generally, this is specified in one of the following: local government ordinances, user agreements or the public water system assumes full responsibility.

(iii) Identification of Cross Connections and Backflow Prevention Assembly or Backflow Prevention Method Selection

If the supplier discovers an uncontrolled cross connection and believes that a backflow contamination event has not occurred, the supplier must: first determine the type of backflow prevention assembly or backflow prevention method needed to control the cross connection and second install and maintain or require the customer to install and maintain a backflow prevention assembly or backflow prevention method at the uncontrolled cross connection, suspend service to the customer, or remove the cross connection, no later than 120 days after its discovery.

***Note to supplier. Suppliers should include in the written BPCCC program guidelines and criteria used to select the type of backflow prevention assembly or method used to control an identified cross connection. Guidelines and criteria should address examples of cross connections throughout the water systems distribution system along with the corresponding appropriate backflow prevention assembly and or backflow prevention method used to control the identified cross connection. Part 4.3 of SDWP Policy 7 provides various examples of backflow prevention assemblies and methods and when the use of such assemblies and methods may be appropriate.

(v & vi) Tracking & Certified Tester Verification

Suppliers must specify the tracking mechanism it will use to verify the installation, maintenance, testing, and inspection of all backflow prevention assemblies and backflow prevention methods used to control cross connections. This section may include the process the supplier will use to ensure backflow prevention assemblies are tested by a Certified Cross-Connection Control Technician

***Note to supplier. Please provide a tracking spreadsheet or description of program or other method which the supplier is using to verify performance and compliance with Regulation 11.

i. To be considered adequate, test reports used to document compliance with Regulation 11 must include all of the following:

Assembly or method information:

a. Assembly or method type;
b. Assembly or method location;
c. Assembly make, model and serial number;
d. Assembly size;
e. Test date; and,
f. Test result (pass/fail).

Certified Cross-Connection Control Technician information:

a. Certified Cross-Connection Control Technician certification agency;
b. Certification number;
c. Certification expiration date or statement that certification is current;
d. As an alternative to a-c, suppliers may provide documentation of an alternative validation process such as electronic login to reporting software where only current, certified cross-connection control technicians (or their companies) are given a login.

Renewal Documents and Invoice
1/1/2023 to EOD 12/31/2023

Acceptance of this coverage is evidenced only by payment of the enclosed invoice by January 1, 2023.

The following renewal documents are attached where applicable:

1. Invoice: Payment is due upon receipt. Please return a copy of the invoice with your payment to ensure that it is applied correctly. We have attached a Coverage Contribution instructions sheet which provides details about your payment.

2. Comparison of Annual Contributions.

3. Deductible Options:
   - Provides the difference in cost by coverage line if you were to increase or decrease the deductible for that specific coverage.

4. Quote for Excess Liability limits for your consideration:
   - Limits of up to $8 million, in excess of the primary $2 million Liability limit, are available. Although the primary $2 million Liability limit is sufficient to cover the CGIA tort cap, we do recommend you consider purchasing higher limits primarily due to special districts' unlimited liability to federal civil rights, discrimination, harassment, whistle blowing, and other employment-related practices claims.

5. Coverage Declaration Pages: Informational page summarizing the key points about the coverage provided including limits and deductible descriptions for all coverage provided. Full coverage forms will be available at csdpool.org/documents by January 1, 2023.

6. Schedules: Lists of exposures and values.

7. Certificates of coverage: Originals are mailed directly to the Certificate Holders.

8. Automobile identification cards: Hard copies will be mailed.

Payment Instructions

The annual contribution for coverage with the Pool is due upon receipt of this invoice.

We accept the following payment methods:

1. Online using **E-Bill Express** (www.e-billexpress.com/ebpp/CSDPool). For detailed instructions, please click here or go to csdpool.org/documents. You can also find an FAQ here or go to the E-Bill Express logon screen.

2. Mail your check to:

   Colorado Special Districts Property and Liability Pool
   c/o McGriff Insurance Services, Inc.
   PO Box 1539
   Portland, OR 97207

   For express or overnight mail services, please use the address below:

   Colorado Special Districts Property and Liability Pool
   c/o McGriff Insurance Services, Inc.
   1800 SW 1st Ave, Suite 400
   Portland, OR 97201

   To ensure that your payment is accurately applied, please always include a copy of the invoice.

3. Wire or ACH transfer from your own bank account. Please let us know if you wish to use this method and we will be happy to provide you with these instructions.

Please be advised that in accordance with the Intergovernmental Agreement (IGA), automatic expulsion will occur on the 60th day should your account not be current. If you wish to reinstate your district's coverage after cancellation has occurred, a $100 reinstatement fee will apply.

If your district requires a payment extension, please submit a written request within ten (10) business days from the date of the invoice, for consideration by the CSD Pool Board of Directors.

Finally, all members of the Pool must be members in good standing with the Special District Association of Colorado (SDA). Please visit the SDA website at sdaco.org for member information.

Please contact us at billing@csdpool.org or 800-318-8870 ext. 3 for billing questions.

PROPERTY ENDORSEMENT

Named Member: Pinewood Springs Water District	**Property Form No:** CSD Pool Property 01 01 23
Certificate Number: 23PL-54404-3299	**Effective Date of Endorsement:** 1/1/2023
Issued By: Colorado Special Districts Property and Liability Pool	

This endorsement modifies coverage provided under the following:

PROPERTY COVERAGE DOCUMENT

WIND AND HAIL DEDUCTIBLE

PLEASE READ IT CAREFULLY

The following is added to Section 2. **DEDUCTIBLE**:

E. Wind and/or Hail damage to a building or structure identified in the **Member District** property schedule as **Real Property** or **Outdoor Property**:

In respect to Member District's whose total scheduled property values are below $25M, 2% per **Occurrence** of the value of the covered damaged property and applicable business income at the time the loss occurs, subject to a $5,000 minimum and $50,000 maximum per **Occurrence**, unless a higher deductible is scheduled at the damaged location.

In respect to Member District's whose total scheduled property values are over $25M, 2% per **Occurrence** of the value of the covered damaged property and applicable business income at the time the loss occurs, subject to a $5,000 minimum and $75,000 maximum per **Occurrence**, unless a higher deductible is scheduled at the damaged location.

ALL OTHER TERMS AND CONDITIONS OF THE PROPERTY COVERAGE FORM REMAIN UNCHANGED.

PROPERTY ENDORSEMENT

Named Member: Pinewood Springs Water District	**Property Form No:** CSD Pool Property 01 01 23
Certificate Number: 23PL-54404-3299	**Effective Date of Endorsement:** 1/1/2023
Issued By: Colorado Special Districts Property and Liability Pool	

This endorsement modifies the coverage provided under the following:

PROPERTY COVERAGE DOCUMENT

COSMETIC DAMAGE EXCLUSION

PLEASE READ IT CAREFULLY

The following is added to Section 7 PERILS EXCLUDED:

V. Against **Cosmetic Damage** to **Roof Surfacing** caused by or resulting from wind and/or hail to a building or structure identified in the **Member District** property schedule as **Real Property** or **Outdoor Property**.

For purposes of this endorsement, the following is added to SECTION 32 ADDITIONAL DEFINITIONS:

Roof Surfacing means the shingles, tiles, cladding, metal or synthetic sheeting or similar materials covering the roof and includes all materials used in securing the roof surface and all materials applied to or under the roof surface for moisture protection, as well as roof flashing, vent covers and gutters.

Cosmetic Damage means that the wind and/or hail caused marring, pitting or other superficial damage that altered the appearance of the roof surfacing, but such damage does not prevent the roof from continuing to function as a barrier to entrance of the elements to the same extent as it did before the cosmetic damage occurred.

However, this exclusion shall not apply to **Cosmetic Damage** to the front entry, areas of **Roof Surfacing** visibly apparent to a pedestrian from the street or sidewalk composing less than 25% of the roof area of a **Member District's** scheduled building or structure identified as **Real Property** or **Outdoor Property**. The **Pool** will pay for **Cosmetic Damage** to such areas, limited to less than 25% of the roof area of the scheduled building or structure, subject to all other terms, conditions and exclusions of the Property Coverage Form.

ALL OTHER TERMS AND CONDITIONS OF THE PROPERTY COVERAGE FORM REMAIN UNCHANGED.

DISTRICT COURT, WATER DIVISION NO. 1, COLORADO 901 9th Avenue Greeley, Colorado 80631 (970)351-7300	
CONCERNING THE APPLICATION FOR WATER RIGHTS OF PINEWOOD SPRINGS WATER DISTRICT IN LARIMER COUNTY	• COURT USE ONLY • Case Number: 2002CW347

FINDINGS OF FACT, CONCLUSIONS OF LAW, JUDGMENT AND DECREE

This application was filed with the Water Clerk, Water Division No. 1, on December 30, 2002, and the Court, having considered the pleadings, the stipulations of the parties, and the evidence presented, does hereby find and conclude as follows:

FINDINGS OF FACT

1. The name and address of the applicant are: Pinewood Springs Water District, 183 Cree Court, Lyons, Colorado 80540-8118.

2. Timely and adequate notice of the application was given as required by statute, and the Court has jurisdiction over the subject matter of this proceeding and over all parties affected hereby, whether they have appeared or not. None of the lands or water involved in this application are within the boundaries of a designated groundwater basin.

3. Timely statements of opposition were filed by Jon and Sharon Jacksi, Big Elk Meadows Association, The Boulder and Larimer County Irrigating and Manufacturing Ditch Company, and Thompson Water Users Association. No person or entity has sought to intervene. The time for filing statements of opposition and motions to intervene has expired.

4. Applicant has entered into stipulations with
The Court has reviewed the stipulations and has entered orders approving them. The Court finds that this decree is consistent with the provisions of the stipulations.

5. Applicant seeks a decree confirming and approving the following described water storage rights:

A. Names of water storage rights: Maure Hollow Reservoir, Crescent Lake/Powelson Reservoir, Crow Lane Reservoir No. 1, Crow Lane Reservoir No. 2 and Pinewood Springs Reservoir.

B. Legal descriptions of locations of dams:

(1) Maure Hollow Reservoir: Maure Hollow Reservoir will be located on Maure Hollow, a tributary of the Little Thompson River, in the NW1/4 of the NW1/4 of Section 28, Township 4 North, Range 71 West of the 6th P.M., Larimer County, Colorado. The center of the dam will be located approximately 1200 feet East of the West line and 1100 feet South of the North line of said Section 28.

(2) Crescent Lake/Powelson Reservoir: Crescent Lake/Powelson Reservoir will be located on an unnamed tributary of the Little Thompson River, in the SW1/4 of the NE1/4 of Section 28, Township 4 North, Range 71 West of the 6th P.M., Larimer County, Colorado. The center of the dam will be located approximately 350 feet East of the West line of the SW1/4 of the NE1/4 and 450 feet South of the North line of the SW1/4 of the NE1/4 of said Section 28.

(3) Crow Lane Reservoir No. 1: Crow Lane Reservoir No. 1 will be located on an unnamed tributary of the Little Thompson River, in the SE1/4 of the SE1/4 of Section 29, Township 4 North, Range 71 West of the 6th P.M., Larimer County, Colorado. The center of the dam will be located approximately 250 feet West of the East line and 50 feet North of the South line of said Section 29.

(4) Crow Lane Reservoir No. 2: Crow Lane Reservoir No. 2 will be located on an unnamed tributary of the Little Thompson River, in the NE1/4 of the NE1/4 of Section 32, Township 4 North, Range 71 West of the 6th P.M., Larimer County, Colorado. The center of the dam will be located

approximately 250 feet West of the East line and 750 feet South of the North line of said Section 32.

(5) Pinewood Springs Reservoir: Pinewood Springs Reservoir will be located on an unnamed tributary of the Little Thompson River, in the NW1/4 of the SW1/4 of Section 28, Township 4 North, Range 76 West of the 6th P.M., Larimer County, Colorado. The northwest abutment of the dam will be located at or near a point which bears North 33°40' East a distance of 575 feet from the southwest corner of the Nl/2 of the SW1/4 of said Section 28.

C. Names and capacities of ditch or ditches used to fill reservoirs and legal description of each point of diversion:

(1) Maure Hollow Reservoir, Crow Lane Reservoir No. 1. Crow Lane Reservoir No. 2, and Pinewood Springs Reservoir: Maure Hollow Reservoir, Crow Lane Reservoir No. 1, Crow Lane Reservoir No. 2 and Pinewood Springs Reservoir will be on-channel reservoirs and will store water from their respective drainage basins. In addition, water will be diverted from the Little Thompson River at a point located in the SE1/4 of the NW1/4 of Section 28, Township 4 North, Range 71 West, 6th P.M., Larimer County, whence the north quarter corner, Section 28 bears North 42°46'43" East, 1,943.68 feet, and will be conveyed through pipelines to the reservoirs. The maximum rate of diversion to storage from the Little Thompson River will be 1 cfs for each reservoir. This point of diversion is the same as the point of diversion for the Pinewood Springs Collection Gallery, decreed in Case No. 88CW236, District Court, Water Division No. 1, on February 23, 1990.

(2) Crescent Lake/Powelson Reservoir: Crescent Lake/Powelson Reservoir will be an on-channel reservoir and will store water from its drainage basin. In addition, water will be diverted from the Little Thompson River at a point located in the NW1/4 of the NE1/4 of Section 28, Township 4 North, Range 71 West, 6th P.M., Larimer County, approximately 700 feet East of the West line of the NW1/4 of the NE1/4 and 200 feet North of the South line of the NW1/4 of the NE1/4 of said Section 28, and will be conveyed through a pipeline to the reservoir. The maximum rate of diversion to storage will be 1 cfs.

D. Sources:

(1) Maure Hollow Reservoir: Little Thompson River and Maure Hollow, a tributary to the Little Thompson River.

(2) Crescent Lake/Powelson Reservoir: Little Thompson River and an unnamed tributary to the Little Thompson River.

(3) Crow Lane Reservoir No. 1: Little Thompson River and an unnamed tributary to the Little Thompson River.

(4) Crow Lane Reservoir No. 2: Little Thompson River and an unnamed tributary to the Little Thompson River.

(5) Pinewood Springs Reservoir: Little Thompson River and an unnamed tributary to the Little Thompson River.

E. Dates of Appropriation: September 27,2000 for Crescent Lake/Powelson Reservoir; July 30,2002 for Maure Hollow Reservoir, Crow Lane Reservoir No. 1, Crow Lane Reservoir No. 2 and Pinewood Springs Reservoir.

F. Amounts:

(1) Maure Hollow Reservoir: 45 acre-feet, CONDITIONAL, with the right to fill and refill continuously.

(2) Crescent Lake/Powelson Reservoir: 18 acre-feet, CONDITIONAL, with the right to fill and refill continuously.

(3) Crow Lane Reservoir No. 1: 51 acre-feet, CONDITIONAL, with the right to fill and refill continuously.

(4) Crow Lane Reservoir No. 2: 39 acre-feet, CONDITIONAL, with the right to fill and refill continuously.

(5) Pinewood Springs Reservoir: 20 acre-feet, CONDITIONAL, with the right to fill and refill continuously.

G. Rates of diversion in cfs for filling the reservoirs from the Little Thompson River points of diversion:

(1) Maure Hollow Reservoir: 1 cfs for diversion to storage from the Little Thompson River.

(2) Crescent Lake/Powelson Reservoir: 1 cfs for diversion to storage from the Little Thompson River.

(3) Crow Lane Reservoir No. 1: 1 cfs for diversion to storage from the Little Thompson River.

(4) Crow Lane Reservoir No. 2: 1 cfs for diversion to storage from the Little Thompson River.

(5) Pinewood Springs Reservoir: 1 cfs for diversion to storage from the Little Thompson River.

H. Use: Municipal use within the Pinewood Springs Subdivision including, but not limited to, domestic, recreational, fish and wildlife preservation and propagation, augmentation, replacement and exchange, with the right to use and reuse to extinction for the uses described herein.

6. Applicant has demonstrated that the water will be used by it or by persons or entities with which it has either agency relationships or firm contractual commitments.

7. Applicant has a specific plan and intent to divert, store, or otherwise capture, possess, and control a specific quantity of water for specific beneficial uses.

8. Applicant has demonstrated that unappropriated water is available in the amounts claimed from the sources claimed.

9. Applicant has demonstrated that the water can and will be diverted and beneficially used, and that the project can and will be completed with diligence and within a reasonable time.

10. Applicant has proceeded with reasonable diligence to develop the subject appropriations.

11. The subject water storage rights, if exercised and administered in accordance with the provisions of this decree, will not cause injury to any owner of or person entitled to use water under any vested water right or decreed conditional water right.

CONCLUSIONS OF LAW

12. This application was filed with the Water Court pursuant to § 37-92-302(l)(a), C.R.S. The Court has jurisdiction over the subject matter of this application and over all persons and water rights affected hereby, whether they have appeared or not.

13. Timely and adequate notice of this proceeding was given in the manner required by law.

14. Applicant has complied with all requirements and met all standards and burdens of proof and is therefore entitled to a decree confirming and approving the subject water storage rights as described herein.

15. The subject water storage rights, if exercised and administered in accordance with the provisions of this decree, will not cause injury to any owner of or person entitled to use water under any vested water right or decreed conditional water right.

JUDGMENT AND DECREE

16. The foregoing Findings of Fact and Conclusions of Law are incorporated herein by this reference as if set forth fully herein.

17. The water storage rights described in paragraph 5 above are hereby confirmed and approved.

18. Applicant shall install and maintain such measuring devices or other structures, and shall maintain such records of diversions hereunder, as may be required by State water administration officials for administration of the subject water storage rights. The reservoirs shall be equipped with staff gauges. Applicant shall develop elevation-area-capacity tables for the reservoirs and provide them to the Division Engineer. Applicant shall submit the required accounting information to State water administration officials on a weekly basis during the irrigation season and on a monthly basis during the non-irrigation season, or as otherwise required by State water administration officials. Applicant shall make such information available to the other parties hereto upon request and upon payment of reasonably copying charges. Applicant shall promptly release without use any water stored out-of-priority in the subject reservoirs; provided, however, that out-of-priority storage of

water in the reservoirs shall be allowed if in accordance with § 37-80-120(1), C.R.S. (2003) or successor statutes.

19. Applicant shall not construct any reservoir described herein on land owned by another person or entity unless the right to construct the reservoir on such land is obtained by consent of the landowner, the exercise of the power of eminent domain, or other lawful means.

20. The application herein was filed in the Water Court in the year of 2002 and the water rights herein confirmed and awarded shall be administered as having been filed in that year and shall be junior to all water rights for which applications were filed in previous years. As between all water rights, the applications for which were filed in the same calendar year, priorities shall be determined by historical dates of appropriation and shall not be affected by the date of entry of this decree.

21. The conditional water storage rights decreed herein are continued in full force and effect through_____, 200_. If applicant desires to maintain such conditional water rights, an application for finding of reasonable diligence shall be filed on or before the last day of_____, 200_, or a showing made on or before such date that the conditional water rights have become absolute by reason of the completion of the appropriations.

PINEWOOD SPRINGS WATER

DISTRICT RULES AND REGULATIONS

TABLE OF CONTENTS

PINEWOOD SPRINGS WATER DISTRICT

RULES AND REGULATIONS

SECTION 1. General Explanatory Material

1.1 Scope. This regulation shall be treated and considered as a new and comprehensive regulation, governing the operations and functions of the Pinewood Springs Water District, and shall supersede any previous regulations of the District, as contained in the minutes of the District, which are in conflict with the provisions hereof.

1.2 Policy and Purpose. It is hereby declared that the Rules and Regulations hereinafter set forth will serve a public use and are necessary to insure and protect the health, safety, prosperity, security and general welfare of the inhabitants of the Pinewood Springs Water District.

1.3 Definitions. Unless the context specifically indicates otherwise, the meaning of terms used herein shall be as follows:

1.3.1 "Actual Cost" shall mean all direct costs applicable to the construction of a given water main, including construction, engineering, inspection, plan approval fees, etc., which have been paid by the constructor.

1.3.2 "Accessory Dwelling Unit" shall mean a secondary house or apartment that shares the building lot of a larger, primary home.

1.3.3 "Board" and "Board of Directors" shall mean the governing body of the Pinewood Springs Water District.

1.3.4 "Connection" shall mean the connecting of the service line to the structure, which it is to serve.

1.3.5 "Constructor" shall mean any person, corporation, partnership, association or firm desiring to construct an extension of or to the district's water distribution system or a connection to the district's system.

1.3.6 "Contractor" shall mean any person, firm, or corporation licensed by the District to perform work and to furnish materials therefore within the District.

1.3.7 "Customer" shall mean any person, company, corporation or governmental authority or agency who is a property owner within the District and is authorized to use water or connect to a water main under a permit issued by the Board of Directors.

1.3.8 "District" shall mean the Pinewood Springs Water District.

1.3.9 "EQR" shall mean Equivalent Residential Unit.

1.3.10 "Inspector" shall mean the person or persons duly authorized by the District to enforce these Rules and Regulations. The Rules and Regulations may also be enforced by the Superintendent.

1.3.11 "Licensed Plumber" or "Pipe Layer" shall mean the person provided a license to work in the District.

1.3.12 "Permit" shall mean written permission of the Board of Directors to connect to a water main of the District pursuant to the Rules and Regulations of the District.

1.3.13 "Person" shall mean any individual, firm, company association, society, corporation or group.

1.3.14 "Service Lateral" shall mean the pipe, line or conduit from the water main to the edge of the highway right-of- way, easement or property line.

1.3.15 "Service Line" shall mean the pipe, line or conduit from the service lateral to an individual house or other structure.

1.3.16 "Shall" is mandatory; "may" is permissive.

1.3.17 “Short-term rental” shall mean a furnished housing unit occupied by a tenant for a period of 30 consecutive days or less where charges are secured.”

1.3.18 "Stub-in" shall mean the connection of the service line to the service lateral.

1.3.19 "Superintendent" shall mean the Superintendent of the District, or in his absence, his duly authorized Deputy.

1.3.20 "User" shall mean any person to whom water service is served, be it renter, record owner, corporation, company, individual, etc.

1.3.21 "Water Main" shall mean any water pipe, line or portion thereof owned by the District.

1.3.22 "Water Tap" shall mean the act of connecting a service line to a service lateral.

1.3.23 ANY OTHER ITEM not herein defined shall be defined as presented in the "Glossary--Water and Sewage Control Engineering" A.P.H.A., A.W.W.A., A.S.C.E., and F.W.S.A., latest editions.

SECTION 2. Ownership and Operation of Facilities

2.1 Policy. Subject to the provisions of Section 4, the District is responsible for the distribution of water for **domestic** in-house use to **residents** within the District and the maintenance, repair and replacement of all mains, hydrants, valves, meters, wells and service facilities owned by the District, but shall not be liable or responsible for inadequate pressure or interruption of service brought about by circumstances beyond its control.

The District is generally responsible for providing water storage and treatment facilities, and shall endeavor to plan for, capitalize and build adequate capital improvements as demand occurs; but the district shall not be liable or responsible for failure to provide additional service when capacity is exceeded by demand.

2.2 Liability. It is expressly stipulated that no claim for damage shall be made against the District by reason of the following: breaking of any service of supply line, pipe, cock or meter by any employee of the District; failure of the water supply; shutting off or turning on water in the water mains; the making of connections or extensions; damage caused by water running or escaping from open or defective faucets; burst service pipes or other facilities not owned by the District; damage to water heaters, boilers or other appliances resulting from shutting water off, or turning water on, or from inadequate or sporadic pressures; or for doing anything to the water system of the District deemed necessary by the Board of Directors or its agents. The District hereby reserves the right to cut off the water supply at any time, for any reason deemed appropriate.

2.2.1 Notwithstanding the above liability provisions, all liability actions concerning the District shall be in conformance with C.R.S. 1973, 24-10-101, et. seq., commonly called the Colorado Governmental Immunity Act.

2.3 Powers and Authority of Inspectors.

2.3.1 The Superintendent, Inspector and other duly authorized employees, agents or representatives of the District shall be permitted to enter upon all properties and drainages for the purpose of inspection, observation, measurement, sampling and testing, in accordance with the provisions of these Rules and Regulations, and shall have authority to shut off service.

2.3.2 The Superintendent shall be authorized to expend not in excess of $500.00 without Board approval; and not in excess of $1000.00 in emergency situations. In each case, the Superintendent will attempt to notify the Board prior to making such expenditures and will fully account for such expenditures.

2.4 Defective Meters. When meters are in service, it shall be the duty of all customers to notify the District office or Superintendent if their water meters are operating defectively.

2.4.1 The District will remove a defective meter and install a replacement meter; however, the District assumes no responsibility for the cost of water as shown by defective meters, or for any cost or expenses relating to or caused by malfunctioning meters.

2.4.2 At the request of the customer, the District will remove a defective meter and install a replacement meter. The District will be responsible for routine repairs. The cost of repair of deliberate damage to the meter will be billed to the customer.

SECTION 3. Use of Public System

3.1 Use Only By Authorized Persons. No person, other than authorized persons including, but not limited to, plumbing contractors performing usual and ordinary services in accordance with recognized customs and standards, shall:

3.1.1 Uncover, or connect any pipes, tubes, stopcock, or any other instrument or contrivance with any main, service pipe, or other medium conducting or supplying water to any building without the knowledge and written consent of the District;

3.1.2 Alter, obstruct or interfere with the action of any meter provided for measuring or registering the quantity of water passing through said meter without the knowledge and written consent of the District.

3.2 Use by Unauthorized Person a Misdemeanor. Any person who, in any manner commits one of the acts described in Section 3.1 without the knowledge and written consent of the District commits a Class 2 Misdemeanor.

3.3 Responsibilities of the Customer. Each customer shall be responsible for installing and maintaining the entire length of his water service line from the meter to the structure. Leaks or breaks in the service line shall be repaired by the customer within a reasonable period from the time of discovery or notification of such condition by the District. If satisfactory progress toward repairing said leak has not been accomplished within the same time period, the Inspector or Superintendent shall shut off service until the leaks or breaks have been repaired.

3.3.1 It shall be the duty of all customers connected to the water system to keep advised of varying pressures and conditions of service so as to properly protect their persons and property from injury by water furnished through the District's facilities.

3.3.2 Employees of the District are expressly forbidden to do any plumbing work whatsoever, except, with a customer's permission, the initial hook-up to the meter. Payment for this work shall be made to the District and shall be subject to the same terms and conditions for payment of service fees as stated in Sections 7.8.2 to 7.10 inclusive. All persons having boilers and/or other appliances on their premises dependent on pressures or water in pipes, or on a continual supply of water, shall provide, at their own expense, suitable safety appliances to protect themselves and their property against a stoppage of water supply or loss of pressure.

3.3.3 The District operates under the requirements of an Augmentation Plan, Case No. W-8001(75), dated 24 Feb. 1976. Water supplied by the District's water system shall be used for domestic, in-house use only. Outside water use is not permitted. Irrigation of lawns, shrubs, trees or gardens and washing of vehicles is not permitted. The District has the right to assess fines or to revoke water service to any customer using District-supplied water for other than domestic, in-house purposes.

3.3.4 Each customer shall be responsible for installation, inspection, testing, and maintenance of any devices required by federal and/or state regulations in order to be safely connected to a municipal water system. Failure to comply

with federal and/or state regulations may result in penalties up to and including revocation of water service.

3.4 Unauthorized Use of Hydrant Wrench or Valve Shut-off Keys Unlawful. It shall be unlawful for any person other than authorized personnel to use a hydrant wrench or valve shut-off key without prior authorization from the Board, and any police officer or personnel of the district or Fire Department are hereby authorized to confiscate any hydrant wrench or valve shut-off key used without such prior authorization.

3.5 Protection from Damage. No unauthorized person shall maliciously, willfully, or negligently, break, damage, destroy, uncover, deface or tamper with any structure, appurtenance or equipment which is part of the water system including fire hydrants.

3.5.1 Any person violating any of the provisions of these Rules and Regulations shall become liable to the Board for any expense, loss or damage occasioned by reason of such violation.

3.6 Water Saver Water Closet. All structures constructed after the effective date of these Rules and Regulations shall be equipped with a "water saver" water closet. A "water saver" water closet is defined as one that uses 1.6 gallons of water or less per flush.

3.7 Meter Installation for New Construction. All structures shall include the installation of a District approved water meter at a location to be determined by the Board or its duly authorized representative.

3.7.1 The property owner will purchase the meter from the District at actual cost to the District. This is necessary for the District to maintain quality control of the meters used.

3.7.2 The property owner, at his/her expense, will contract with the District to construct the meter pit and install the meter and all appurtenances thereto.

3.7.3 Following installation, the meter shall be owned by the District and shall become part of the water service facilities of the District.

3.8 Meter Installations for all Commercial Establishments. All commercial establishments, new or existing, retail or wholesale, shall install a District-approved water meter, at their expense, for the purpose of monitoring the volume of water use. The location of the meter shall be determined by the Board or its duly authorized representative.

3.8.1 All meters for commercial establishments shall be read monthly by the Superintendent and those findings reported to the Treasurer/Administrative Clerk for the purpose of billing the users as set forth in Appendix A.

3.8.2 The Board may, in its discretion, require that all commercial establishments curtail their use of water over and above the allotted amounts for the EQR's held by those commercial establishments during times when the water supply is limited, The Board has determined that continued commercial use in excess of the allotted amounts for commercial establishments creates an unacceptable seasonal demand on the District's facilities.

Water service to any commercial establishment may be revoked by the District upon failure to comply with a request from the Board under this section. In the event of such failure to comply with the Board's request, the commercial establishment

shall be given due notice of a hearing to revoke service. Said hearing shall be held by the District at a regular or special meeting of the Board of Directors, at which time the customer shall have the opportunity to present testimony and evidence to the Board. Following said hearing, the Board's decision shall be final and service to the property may be revoked by disconnecting appropriate lines, either public or private, serving the property, or not, as the Board decides.

3.8.3 In the interest of water conservation, the number of taps a commercial establishment may purchase is three, if available.

3.9 Number of Water Taps Upon Sale of Dwelling. A customer who sells his dwelling or property must transfer the number of EQRs, which have been purchased by the selling customer or allocated to that dwelling or property, if any.

3.9.1 The payment of a tap fee entitles a purchaser to use the District's water service only so long as he remains the owner of the dwelling identified on the Application and Permit for Water Tap and/or Service. (Appendix C)

3.9.2 Following the initial tap by a customer, the number of EQR's purchased or allocated to a customer shall remain and be transferred only with the property identified on the Application and Permit for Water Tap and/or Service. (Appendix C)

3.9.3 Nothing in this Section shall imply that a customer or purchaser of a dwelling and/or property cannot apply for additional EQR's, or that the right of service cannot be revoked in accordance with these Rules and Regulations.

3.9.4 The attempted sale of one or more EQR's, or portion thereof, apart from the dwelling or property without the written approval of the Board of Directors may be grounds for revocation of the customer's right to his allocated EQR's.

SECTION 4. Application for Service

4.1 Inclusions. Water service will be furnished only to persons whose property is included in the District and who have agreed to abide by the Rules, Regulations and Rates promulgated by the District.

4.1.1 It shall be incumbent upon the applicant to furnish satisfactory evidence of inclusion whenever such evidence is requested by the District. Satisfactory evidence shall consist of a tax receipt, or certificate in lieu thereof, issued by and signed by the County Treasurer.

4.2 Application and Permit for Water Tap and Service. An Application and Permit for Water Tap and/or Service must be filed with the District, on the District's standard form, and be accompanied by appropriate fees, prior to action by the Board or its designated representative to affect connection to the District's water system. (Appendix C)

4.2.1 An Application and Permit for Water Tap and/or Service shall expire one (1) year from the original application date if not connected to the water system. Water taps purchased prior to May 26, 1999, shall have no expiration date. It shall be incumbent upon the applicant to furnish satisfactory evidence of any previously paid water tap fees. Satisfactory evidence shall consist of a receipt, letter, canceled check referencing paid tap, or past District records.

4.2.2 When an Application and Permit for Water Tap and/or Service expires, the District shall retain the previously paid tap fees. The previously paid water tap fees shall be credited toward the current water tap fee when a new application for water tap is filed, as described in Section 4.2.1.

4.3 Cancellation of Application. The District reserves the right to revoke any application previously granted before service has been provided should applicant not agree to abide by the Rules, Regulations and Rates promulgated by the District.

4.4 Denial of Application. The District reserves the right to deny application for service on any of the following grounds:

4.4.1 That connection of the system to applicant's existing system would constitute cross-connection to an unsafe water supply; or

4.4.2 That the service applied for would create an excessive demand on the facilities; or

4.4.3 For misrepresentation in the application as to the property and fixtures contained in the property, or the use to be made of the water supply; or

4.4.4 That the area to be served is situated in a pressure zone which the District lacks capacity to serve as shown on District maps.

4.5 Change in Customer's Equipment or Service. Prior to making any change in water service or meter installation, a customer shall file an amended application with the District at least forty-eight (48) hours prior to making the proposed change.

4.5.1 No change in the customer's equipment or service shall be made without the prior approval of the District being first obtained in writing.

4.6 Unauthorized Connection Fees. An unauthorized connection fee equal to three (3) times the normal tap fee due may be collected by the District from persons connecting to the District's system without prior payment of connection fees, approval of application and permit, or adequate inspection of lines. The District, at its election, may require disconnection of any unauthorized connection at owner's expense.

4.7 Revocation of Water Service. Water service may be revoked by the District for non-payment of fees, rates, tolls and charges duly imposed and due and owing the District or for water-use violations. Service to the property will be terminated by disconnecting appropriate lines, either public or private, serving the property, or not, as the Board decides.

4.7.1 In the event a customer receives a disconnect notice for non-payment of fees, rates, tolls, and charges, the customer may request a hearing prior to revocation of service. A customer requesting a hearing prior to revocation of service for non-payment must post bond in the amount of the delinquency and the cost of the hearing.

4.7.2 In the event the Board determines there has been a violation of water use, the customer shall be given written notice by the Board or its designated representative to correct the violation and attend a hearing. The customer shall be allowed three (3) days following receipt of the notice in which to correct the violation. If the violation is not corrected within three (3) days, water service may be terminated immediately. At the hearing, the Board may assess fines up to $200 per occurrence or day and/or order revocation of service.

The District operates under the requirements of the Augmentation Plan. Water supplied by the District's water system is for domestic, in-house use only. Outside water use is not permitted. Reference Section 3.3.

4.7.3 Hearings shall be held by the District at a regular or a special meeting of the Board of Directors, at which time the customer shall have the opportunity to present testimony and evidence to the Board. Customer will be given due notice of the time and date of said hearing. Following the hearing, the Board's decision shall be final.

4.7.4 If water service to the property is terminated, the customer shall be assessed a turn-on fee to restore water service after all fees, rates, tolls, charges and fines are paid and water use violations are corrected.

SECTION 5. Construction of Service Lines

5.1 A separate and independent service line shall be provided for every building. Construction of all service lines shall be done by Constructors, or by plumbers licensed in accordance with the Technical Plumbing Code of the State of Colorado.

5.2 Existing water lines may be used in connection with new buildings only when found, on examination by the Superintendent, to meet all the requirements of these Rules and Regulations.

5.3 The water service line shall be a minimum of 3/4" I.D. of the type outlined by the Board. It will be either copper, Polyurethane or P.V.C. with pressure ratings capable of satisfying the pressure zones of the District.

5.4 The water service shall be brought to any building at an elevation of at least five (5) feet of cover and at least six (6) feet of cover under driveways.

5.5 All excavations required for the installation of water service shall be open trench work, unless otherwise approved by the Superintendent. Pipe laying and back-fill shall be performed in accordance with the Board's standard specifications.

5.6 The applicant for the building water service permit shall notify the Superintendent when the service is ready for inspection and connection to the public water main. (Appendix C)

5.7 The violation of any of these Rules and Regulations, or the District's installation specifications, shall constitute sufficient grounds for revocation of the permit. Whenever it appears a violation has been committed, the plumber or Constructor shall be sent a written notice.

5.8 No licensed plumber shall permit his license to be used by any other plumber, but plumbing work contracted for by a licensed plumber may be performed by him through journeymen plumbers or apprentices under his direct supervision. Work performed through journeymen plumbers or apprentices shall not relieve the licensed plumber from any responsibility.

5.9 All water lines within the area under jurisdiction of the Board shall be installed only by Constructors approved to perform work within the area.

5.10 All Constructors, plumbers and others doing work on any water main, service laterals, service lines, or structures in the District, shall comply with Larimer County or State Highway Department regulations on excavation, back-fill, compaction and restoration of surface. Notwithstanding the foregoing, all streets shall be restored to their same condition as existed prior to excavation.

The District may impose conditions and restrictions appropriate to assure compliance by Constructors and plumbers.

5.11 All construction work and materials shall meet the standards and specifications of the Pinewood Springs Water District, attached hereto as Appendix B.

5.12 All permits, fees and licenses shall be paid for by the owner, Constructor, plumber, or others doing work in the District, prior to the start of construction.

5.13 All excavations for water service installations, all maintenance, and all repair work shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public or private property disturbed in the course of the work shall be restored in a manner satisfactory to the Superintendent.

5.14 All daily inspection fees on water construction required by Larimer County or the State Highway Department shall be paid by the owner, plumber, Constructor or others doing work in the District.

5.15 There shall be no inspection charges for inspection by the Inspector or Superintendent of the District in connection with water mains and water lines.

5.16 The Superintendent of the District or other authorized persons are the sole individuals authorized to supervise, or make taps on the District water mains.

5.17 The Superintendent of the District or other authorized personnel are hereby authorized to inspect all service lines and other facilities constructed within the District.

SECTION 6. Water Main Extensions

6.1 Requirements in Section 5 of these Rules and Regulations, where applicable, shall also pertain to this Section. The term "water mains" as used in this section shall include tanks, pumps and related facilities, when applicable.

6.2 It shall be unlawful for any person to construct a water main within the jurisdiction of the District without having first made formal application to the Board for approval, and having complied with the regulations of the Board.

6.3 All water main extensions within the jurisdiction of the District must have the prior approval of the Board of Directors. Plans for such extensions shall be submitted to the District's engineer, along with the application for a line extension. The staff shall then submit the recommended plans, with appropriate documentation, to the Board for final approval. Said plans shall be reviewed for compliance with the District's specifications attached hereto as Appendix B, and with other specifications and requirements appropriate to the situation, and such study for compliance shall be at the owner's expense.

6.4 Water mains shall be installed in roads or streets which the County, State Highway Department or other public agency, has accepted for maintenance as a public right-of-way or in easements granted to the District.

6.5 All water main extensions, that are approved and are to be constructed by the District shall be contracted for by the Board, with the contractor installing the mains being responsible to the Board. Construction of these lines and consulting engineering fees, as established herein, shall be paid by the District.

6.6 A performance and payment bond(s) equal to one hundred percent (100%) of the contract (or construction cost) shall be furnished to the District on all water main construction contracted for by the District.

6.7 All daily inspection fees on water mains required by the County of Larimer, the State Highway Department, or local governments, shall be paid by the Constructor doing work in the District.

6.8 Special structures such as pumping stations, etc., required to ensure proper operation of the water extensions, shall be constructed from designs of the District's engineers or such other engineers as may be approved by the Board.

6.9 Customers who have completed construction of water mains shall, before these lines are accepted by the District for taps, convey these lines and appurtenances to the District, free and clear of all liens and encumbrances, and the bond furnished in paragraph 6.6 shall cover all maintenance for one (1) year from the date of acceptance of the lines by the District.

6.9.1 Prior to the acceptance of the lines by the District, all easements necessarily accompanying these lines shall be duly recorded and provided for at Constructor's expense.

6.9.2 Prior to the District's acceptance of the lines, "as built" drawings shall be provided by the Constructor or reasonable provision for such drawings made.

6.10 Water main sizes required to serve any area of the District shall be determined by the District.

6.11 Notwithstanding any provision of this Article, the District may, in its discretion, extend lines under such conditions as the Board deems appropriate. Where water mains cannot be installed in a street, private drive or common area, and must be installed in easements between adjacent pieces of property, the lines will terminate at the point on the line or corner of the property being served which requires the least amount of construction by the District.

SECTION 7. Rates and Charges

7.1 General. The information contained in this Section is pertinent to all charges of whatever nature to be levied for the provision of water service. Said rates and charges as herein established are in existence and effect at this time and shall remain in effect until modified by the Board of Directors under the provisions of these Rules and Regulations, and under the applicable statutes of the State of Colorado. Nothing contained herein shall limit the Board from properly modifying rates and charges, or from modifying any classification.

7.2 Application of this Section. The rates, charges, and other information shown herein shall apply only to customers inside the District and shall in no way obligate the District to provide service outside the District under any of the conditions contained in this Section.

7.3 Classification of Customers. For the purpose of levying fair, reasonable, uniform and equitable charges, the following classifications and appropriate definitions are provided.

7.3.1 Single Family Dwelling. A single-family dwelling shall be construed as any number of persons living and cooking together in the premises as a single dwelling unit but it shall not include a group of more than three individuals not related by blood or marriage.

7.3.2 Multiple Family dwelling. A multiple-family dwelling shall, consist of a single structure or structures otherwise unattached to any other dwelling unit, and wherein more than one family unit exists.

7.3.3 Retail Business Outlet. A retail business outlet shall be any structure providing for normal commerce or business services except for those business services otherwise defined herein, and where said outlet is provided only with the required sanitary conveniences for the personnel employed at that business outlet. Where more than one business is used in one structure, the Board, at its sole discretion, shall determine the number of equivalent business outlets used therein.

7.3.4 Cafes, Restaurants, Bars. This classification shall include any establishment providing food or beverage service to the general public, and where charges for such service of food and beverages are secured. Such units shall be classified according to equivalent EQR as set forth in Appendix A.

7.3.5 Filling Stations and Garages. Filling stations and garages shall be defined as service outlets providing for the servicing of vehicular units. Under the basic definition of filling station and garages, no provision is made for automatic washing or wash rack facilities. The charges established therefore are for filling stations and garages without washing facilities.

7.3.6 Hospitality Services. This classification shall include any establishment providing hospitality services to the general public and where charges for these services are secured. This would include lodging, Bed & Breakfast, or other commercial enterprise not covered in the previous classifications. Such units shall be classified according to equivalent EQR as set forth in Appendix A. Short-Term/vacation rental of a single-family residence or accessory dwelling unit (ADU) is considered a violation of water use and is subject to penalties described in section 4.7.2, up to and including revocation of water service.

7.3.7 Any disagreement concerning classification shall be resolved by the Board of Directors of the District whose judgment shall be final.

7.4 Tap Fee. A tap fee shall be charged to all customers of the District. Such a fee shall represent a "privilege to serve" fee, assessed and paid before the permit for service is issued.

Tap fees shall be assessed as provided for in the Schedule of Water Rates and Tap Fees attached hereto as Appendix A.

7.5 Monthly Service Charge. Upon signing an Application for Water Tap and/or Service and paying the tap fee, the water service charge shall commence once the tap fee has been paid.

Water service charges shall be reflected in the Schedule of Water Rates and Tap Fees attached hereto as Appendix A.

7.6 Amended Tap Fees. In those situations where a prospective user applies for a permit for water service for a structure not defined in the preceding Section 7.3 or where, in the Board's opinion, said structure represents a classification not contemplated in the establishment of the previously defined tap fees, the Board shall, at its sole discretion, establish a fair, reasonable, and equitable tap fee for said structure.

7.7 Amended Monthly Service Charge. In those situations where, in the Board's sole discretion, the monthly service charges shown in the previous paragraphs do not represent a fair, reasonable and equitable charge for the intended use, the Board, at its sole discretion, may adjust said rates.

7.8 Payment of Monthly Service Charges. All monthly service charges shall be paid as herein set forth.

7.8.1 The service charge shall be billed to each customer every month, which will be termed a "billing period." Service charges will not be billed to renters, as they are the responsibility of the property owner.

The monthly service charges shall be due and payable on or before the 24th day of the month following the billing period. If the Customer feels said statement is in error, the customer must file in writing, a notice to the Treasurer of the District of the presumed error and request a clarification. If the Treasurer is not able to provide a satisfactory clarification for the customer, the customer's bill shall be reviewed by the Board at its next regular meeting. The Customer or his representative may be present at the meeting. Upon review by the Board and/or revision, if necessary, of the statement, payment shall be due and payable no later than the tenth day of the following month.

7.9 Penalty for Late Payment. If a customer's service charges have not been paid in full by the due date, the Treasurer may assess a service charge (interest charge) at the rate of $3.00 per month on the unpaid balance. After the due date, the Board, at its discretion, shall have the right to terminate the customer's service. A 1% interest fee on the balance will be charged to any accounts past due 3 months or more.

The Board shall have the right to assess to any customer who is tardy in payment of his account, all legal, court, and other costs necessary or incidental to the collection of said account.

7.9.1 Disconnect Notices. A notice of disconnection of water service may be issued. Such notification shall take the form of written correspondence, posted or mailed, verbal notice in person or per telephone or recorded message. A service fee shall be assessed and added to the outstanding balance. Charges set forth in Appendix A.

7.9.2 Reinstatement Fee (Turn-on Fee). If service must be discontinued by the Board due to a delinquent account or water use violations, a service charge, as set forth in Appendix A, shall be paid before service will be continued.

7.9.3 Customer Turn-off, Turn-on Request. When a customer does not expect to occupy his home during the winter months, to protect his home and water lines from freeze damage, he may request a "turn-off, turn-on" of water to his residence. There will be no turn-on or turn-off fee for this request.

Regular monthly service fee billing shall continue during this time.

7.10 Penalties for Foreclosure Proceedings. At any time, it becomes necessary for the District, following efforts to collect tardy payment of any fee or charge assessed by the District under these Rules and Regulations and/or Colorado law, to initiate foreclosure proceedings as allowed by Section 32-1-1001 (1)(j), C.R.S. 1973 as amended, the District shall in each such case assess foreclosure fees, including reasonable attorney fees, against the subject property, which fees shall be payable in full upon assessment and shall be included in the amount then being foreclosed. Payment of said foreclosure fee and any and all other fees outstanding against the subject property shall be a precondition to the resumption of service to that property.

7.11 Conditions For Filing a Lien. Overdue service and delinquent account charges, as provided in note 14 of Appendix A, will cause a lien to be filed. Fees will be charged as provided in note 13 of Appendix A.

APPENDIX A

SCHEDULE OF WATER RATES AND TAP FEES

(1) Service fees commence the first full month after the tap fee has been paid.

(2) The Application and Permit for Water Tap and/or Service and a tap fee must be submitted prior to any tap being made.

(3)

CUSTOMER DESCRIPTION	**EQR UNITS***
A. Single-family residence	1.0
B. Bars and Restaurants per each 25-person seating capacity or part thereof	1.0
C. Commercial or public buildings such as stores, offices, and similar uses having no process water:	
1. Minimum for each building or customer up to 1,000 square feet per building area	1.0
2. For each additional 1,000 square feet of building area or part thereof	1.0
3. Additional for each part of public rest rooms	1.0
D. Churches and non-profit organizational halls (no residence or regular eating facilities)	1.0
E. Construction of single-family residence prior to obtaining a Certificate of Occupancy	1.0

The water tap must be paid in full; installation of the septic system for the home must be complete; a backflow preventer (vacuum break) must be installed; a frost-free faucet must be used; AND the Water District Superintendent must approve the service line installation as specified in the Rules and Regulations.

*The EQR Units for Customer Descriptions, not included in the schedule, will be determined by the Board of Directors upon receiving the request for service.

(4) The minimum tap fee for any service is one (1) tap per building.

(5) The basic tap fee per single-family equivalent residential unit (1.0 EQR) shall be calculated on January 1st of each year per the following formula and be effective for the remainder of that year: Current tap fee = last year's tap fee + (last year's base rate * 12) + (last year's system improvement fee * 12) + 5% of last year's tap fee. Example: The tap fee for 2023 is $52,723.20.

(6) The basic water service fee for a single-family residence (1.0 EQR) is calculated as follows:

(A) The basic monthly service charge is assessed regardless of water usage or physical presence of a tap. The monthly service charge consists of a base rate charge and a system improvement fee that are $65.00 and $36.00 respectively for the billing period.

(B) In addition to the basic monthly service charge, water usage is charged based upon the following usage schedule for water produced by the water district:

Usage Range (gallons)	**Charge (per 100 gallons)**
0 to 3000	$0.80
3001 to 6000	$1.60
Greater than 6000	$7.50

(C) In the event that water hauling becomes necessary, the costs to haul water will be billed to customers in addition to the normal usage charges as follows:

1 Customers will be advised when hauling rates go into effect and meters will be read on that date. Usage to that point in the month will be billed according to the structure described in (B) after the usage ranges are adjusted in proportion to the fraction of the month before hauling began.

[(days before hauling)/(days in month)](usage range)= adjusted usage range

2 The following equation (expressed in gallons) will be used to determine if any water produced in the district during the hauling period can be billed at the normal rate described in (B) after the usage ranges have been adjusted in proportion to the fraction of the month after hauling began.

(total billed usage)-(total hauled)=total normal cost water

Total normal cost water will be equally divided amongst the customers and billed at the normal rate. Zero usage customers will not be included in this equation.

3 The hauled water will be billed according to the following hauled water structure.
4 No construction use of water will be allowed while water hauling is in effect.

Usage Range (gallons)	Charge (per 100 gallons
0 to 3000	estimated cost
3001 to 6000	1.5 X estimated cost
Greater than 6000	2 X estimated cost

These ranges refer to a customer's total usage during the hauling period. These usage ranges will be adjusted in proportion to the fraction of the month when water was hauled and to reflect water billed at normal rates [see section (6C2)].

{[(days hauled)/(days in month)}(usage range)}-(normal rate water from section 6C2) = adjusted hauled cost usage range

(7) The monthly service charges for customers with multiple EQR units being serviced through a single tap will be calculated as follows:

(A) The basic monthly service charge is multiplied by the number of EQR units.

(B) The total usage in gallons will be divided by the number of EQR units being serviced through the single meter, an average usage per unit is thus defined.

(C) This usage per unit is then subject to billing under the above rate structure for single family residences.

(D) The resulting usage per unit charge is then multiplied times the number of EQR units to arrive at the water usage charge for the billing period.

(8) Billing of monthly water service fee shall begin the first day of the month following the payment of the tap fee.

(9) All water use will be in compliance with the Water Augmentation Plan of the District (which limits homeowners to NO more than 6000 gallons per month) and the Declaration of Agreement Establishing Building Restrictions in Pinewood Springs. Continued non-compliance after notification by the District may result in termination of water service pursuant to action by the Board of Directors of the District. Water usage by an EQR in excess of the average allowed by the Augmentation Plan (6000/month) will be subject to an excessive usage fee as defined below:

First Offense- a warning letter will be sent from the District.

Additional Offenses-will be based on usage and number of offenses:*

6001-7000 gallons	$100.00 (x # of offenses)
7001-9000 gallons	$250.00 (x # of offenses)
greater than 9000 gallons	$500.00 (x # of offenses)

This is a lifetime accrual of offenses. A warning does not count as an offense. The third offense requires a mandatory appearance at the next regular board meeting for consideration of charges and/or disconnection of services. If the customer fails to appear it will result in termination of water service until such time as appearance before the board is made. Determination of fines, EQR purchase and service termination will be made at the discretion of the Board of Directors at the time of appearance.

*While water is being used during construction of a single-family residence, NO warning will be issued for the first offense and fines will be imposed. All fines will be doubled for excessive water usage (over 6000 gallons a month) during the construction period prior to obtaining a Certificate of Occupancy.

(10) Service Reinstatement Fee (Turn-On Fee) following a Board enforced turn off will be $50.00 per occurrence.

(11) Disconnect Notice Fee for issuance of notice to delinquent accounts will be $25.00 per occurrence.

(12) Returned Check Fee for checks returned for "Not Sufficient Funds" will be $10.00 per occurrence.

(13) Lien Filing Fee for delinquent accounts will be assessed per legal fees incurred.

(14) Any accumulated overdue service and delinquent account charges are sufficient to cause a lien to be filed.

**Appendix A is subject to revision by the Board of Directors at any time without prior notice.

APPENDIX B

SERVICE LINE CONSTRUCTION

1.1 General. Soil conditions vary widely in the Pinewood Springs development and excavation for installation of water service lines must take local conditions into account. Sandy loam, clay, decomposed granite and granite are found. The following recommendations are intended to provide guidance in the installation of service lines to minimize problems and to promote long and satisfactory service.

1.2 Excavation. Dig trenches, straight and true to line, and grade as conditions permit. The bottom of the trench should be free from rock points that could puncture or abrade the service line. It is recommended the service line shall be in open areas free of rock. A minimum of 5 feet of cover over the service line, and six feet of cover over the service line should be provided under driveways and rocky areas. This recommendation is to ensure against winter freezing of the water in the service line.

1.3 Excavation. The service line should be placed in the trench on a cushion of either undisturbed natural soil or compacted fine sand. If compacted sand is required, it should be sufficient depth to provide at least six (6) inches cover over rock points.

1.4 Back-filling. All back-fill material should be free of rocks, large clods, roots and other foreign matter. If an adequate quantity of appropriate back-fill material is not available, six (6) inch cushion of sand should be placed over the service line to avoid damage to the line. If the trench is under a driveway, sidewalk or other structure that could be adversely affected by settlement, the back-fill should be progressively compacted in six(6) inch layers to a 95%compaction.

APPENDIX C

PINEWOOD SPRINGS WATER DISTRICT
APPLICATION AND PERMIT FOR WATER TAP AND/OR SERVICE

Applying for: Water Tap ☐ **Water Service** ☐ **Both** ☐

Property Owner(s): _____

Water Service Address: _____

Billing Address: _____

Telephone: _____

Property Description: Lot # _ Filing # _____

_____

Type of Structure: Single Family _ Other _____

_____

Provide additional detail including number of bathrooms if "Other" is business or commercial _____

Tap Fee Status: If prepaid – Prepaid Date _ Amount _____

_____

If not prepaid - Payment in the amount of_____is attached.

Note: Application for water tap will expire one (1) year from the date of application. (See PSWD Rules and Regulations Section 4.2)

WATER SERVICE AGREEMENT

I,_____, in consideration of the right to connect to and use the District's water system, agree to abide by the following:

1. The duly adopted Rules and Regulations (of which I have received a copy) of the Pinewood Springs Water District and any amendments thereto.
2. Use the District's water supply and water system only for in-house domestic purposes. **Absolutely no outside watering!** (See Section 3.3)
3. Pay for water service as the District may direct.
4. Advise the District when a tap is to be made and request that the District's Superintendent or other authorized personnel be present.
5. No taps shall be made from November 15 to April 1 without prior written authorization from the District.

DATE APPLICANT'S SIGNATURE

PINEWOOD SPRINGS WATER DISTRICT
PERMIT AND INSPECTION FOR WATER SERVICE CONNECTION

Property Owner(s): _____

Water Service Address: _____

Telephone: _____

Property Description: Lot # _____ Filing # _____

Service Line Inspection

Depth of line: _____ Size of line: _____ Type of Pipe: _____

Proper location of line: _____ Type of fill material _____

The service line and connection to the meter pit and service lateral has been completed and inspected and conforms to the District's standards as specified in the Rules and Regulations. Permit for connection to the District's system is approved.

CO0135610 Pinewood Springs WD
Record of Approved Waterworks (RAW)

System Name	Pinewood Springs WD
PWSID No.	CO0135610
County	Larimer County
Created Date	September 22, 2016
Date Modified	**Reason for Modification**
02/10/1999	Approval of study and the addition of soda ash chemical feed equipment for corrosion control. (Greg Akins, Technical Services Unit)
04/23/2004	Plans and specifications approval for addition of microfiltration unit. (Bradley Simons, District Engineer)
06/24/2004	Plans and specifications approval for clear well improvements associated with the addition of microfiltration unit. (Bradley Simons, District Engineer)
09/03/2004	Approval for corrosion control conversion to an ortho/polyphosphate blend. (Bradley Simons, District Engineer)
05/05/2006	Plans and specifications approval for raw water pump station and diversion. (Glenn Bodnar, Technical Services Unit)
09/22/2016	Creation of the draft RAW document. (Michael Emming, Senior Review Engineer)
03/27/2017	Finalization of the RAW document. The final revisions included relocation of the entry point sampling location. (Michael Emming, Senior Review Engineer)

</td></tr>
<tr><td>Optimal Corrosion Control Treatment</td><td>orthophosphate corrosion inhibitor</td></tr>
<tr><td>Overall Treatment Process Description</td><td>Microfiltration (P895), sodium hypochlorite disinfection (D421), corrosion control using ortho-polyphosphate blend (C815), and disinfection contact time (D825).</td></tr>
<tr><td></td><td></td></tr>
<tr><td colspan="2">Treatment Processes</td></tr>
<tr><td>Raw Water Pumps (Pump Facility 5)</td><td>Two (2), vertical turbine pumps installed in the wetwell of the raw water booster pump station. The pumps are rated for 225 gpm and are equipped with a 25 horsepower (hp) constant speed motors.</td></tr>
<tr><td>Compliance Filtration, Microfiltration (P895)</td><td>

Two (2), pressure microfiltration skids (US Filter Memcor Model 6M10C and Scinor SMT600-P23) installed in parallel.

Number of modules per skid: 6.
Membrane surface area per module: 252 square feet (sf).
Membrane surface area per skid: 1,512 sf.
Pre-filter: Y-strainer.

</td></tr>
</table>

	○ Feed pump: One (1) end suction centrifugal pump with a 5 hp constant speed motor. ○ Flow monitoring: Filter feed and filtrate monitored by magnetic flow meters. ○ Pressure monitoring: Filter feed and filtrate monitored by pressure transducers. Inlet pressure to skid, filtrate leaving skid, and backwash monitored by pressure gauges. ○ Cross Connection Control: Provided by an air gap at the 103 gallon break tank and valving to provide a block and bleed configuration on the filtrate line. ● Air Backwashing and Raw Water Flush ○ Process air introduced to the clean side of the membrane at a pressure of not less than 90 pound per square inch (psi) and requiring a total volume of 32 cubic feet (cf) of air. ○ Raw water used to flush dislodged solids from the membranes. ○ Nominal interval between backwashes is 30 minutes. ● Clean-In-Place (CIP) Equipment CIP operation on the filter membranes is completed using sodium hypochlorite and/or citric acid. The process, including chemical addition, is completed manually.
Disinfection, Sodium Hypochlorite (D421)	● Sodium hypochlorite solution (design basis: 10-percent bulk), peristaltic chemical feed pump with spare parts and redundant chemical feed pump kept onsite, and 55 gallon sodium hypochlorite liquid storage drum. ● Sodium hypochlorite injection point after the microfiltration skids, inside the water treatment plant. Residual chlorine monitoring location is the variable volume pump chamber after the clearwell (040). ● Microfiltration system and chlorine pump electrically connected to control dosing.
Disinfection, Contact Time (D825)	● A pipeline contact chamber consisting of 170 linear feet of 4-inch diameter pipe has a contact volume of 111 gallons and a baffle factor of 1.0 based on length to diameter ratio. ● One (1), below-grade baffled concrete clearwell plumbed in series with the pipeline contact chamber is granted a baffle factor of 0.3 (based on a length to width ratio of 7 to 1) with a total active storage volume of 2,470 gallons. The storage volume assumes the baffled chambers within the clearwell are maintained full, which is attainable by the weir wall configuration of the last chamber. Note, no contact time credit is given for the variable volume pump chamber due to the negligible effects the volume has on obtaining the disinfection requirements.

	Corrosion Control, Inhibitor/Sequestering Agent, Phosphate Based (C815)	● Ortho/polyphosphate blend (design basis: Aqua Smart, Inc., SeaQuest), peristaltic chemical feed pump with spare parts and redundant chemical feed pump kept onsite, 50 gallon polyethylene solution feed tank, and secondary chemical containment trough. ● Ortho/polyphosphate blend injection point after the microfiltration skids and chlorine injection point, inside the water treatment plant. ● Microfiltration system and chemical feed pump electrically connected to control dosing.
Treatment Appurtenances	One (1), 6-inch raw water strainer, one (1), 8-inch raw water magnetic flow meter, one (1), 6-inch surge anticipation valve, one (1), 6-inch pressure reducing valve, and one (1), finish water magnetic flow meter.
Backwash Waste Disposal	Backwash waste disposed into soil treatment area (i.e. septic system). The injection well does not appear to be authorized or permitted through the EPA.
Distribution System Booster Pumps (Clear Well Pump Facility 4)	Two (2), multistage centrifugal pumps installed after the clearwell. The pumps are rated for 68 gpm and are equipped with a 7.5 hp constant speed motor. Operation of the pump is controlled by water level in the pump chamber, and only one (1) pump is capable of running at a time.
Monitoring Locations	● Turbidity ○ **CFE**- Combined filter effluent turbidity monitored (design basis: design basis: Hach 1720E) after combination of the flow from the compliance filters and prior to disinfection. ● Residual Disinfectant ○ **EP** - Entry point free chlorine residual monitored (design basis: Hach CL17) from the potable water supply serving the

	treatment plant building (001), which represents the first customer.
Approach to Achieving Adequate Disinfection (Log-Inactivation or Minimum Chlorine)	Minimum Chlorine Residual: 1.0 mg/L (see condition No. 1)
Additional Sample/Monitoring Locations	● Sample Taps ○ N/A ● System Pressure ○ Piping to reservoir, piping to water treatment plant, and distribution system.
Deviations from Design Criteria	
Deviation No. 1	N/A
Conditions of Approval	
Condition No. 1	Per treatment credits above, the water system is required to continuously provide a minimum of 4-log inactivation of viruses by disinfection. Pursuant to Section 11.1(6), to demonstrate adequate disinfection and compliance with Section 11.8(3)(b)(i)(A) of Regulation 11, the System must continuously maintain a **minimum chlorine residual of 1.0 mg/L** at the entry point sampling location (the potable water supply serving the treatment plant building, which represents the first customer) assuming a peak flow rate of 68 gpm (flow limited by the capacity of one (1) distribution system booster pump in service), a maximum pH of 9.0, a minimum temperature of 0.5 °C, and the specifications outlined in the D825 provision above. Monitoring results must be reported on the System's monthly operating report (MOR) to calculate disinfection. ● A total active storage volume of 2,580 gallons (i.e. the piping from the water treatment plant to the clearwell and the three chambers of the clearwell) assumes the full volume of the clearwell can be utilized for contact time due to the tank configuration.

Condition No. 2	The water system must continuously meet the design, performance, and operation and maintenance requirements established in the Department's general acceptance letter, dated July 25, 2012 (or most recent version), titled *General requirements of membrane filtration technologies as Alternative Filtration Technologies for meeting the Colorado Primary Drinking Water Regulations (CPDWR) requirements for Giardia lamblia and Cryptosporidium Removal,* the Department's Evoqua Water Technologies acceptance letter, dated May 23, 2014 or most recent version, titled *Acceptance of the Evoqua Water Technologies Model L10V/L10N/L20V/L20N as an Alternative Filtration Technology to meet the Colorado Primary Drinking Water Regulations requirements for Giardia lamblia and Cryptosporidium Removal,* and the Department's Scinor Water America acceptance letter, dated February 27, 2017 (or most recent version), titled *Acceptance of the Scinor SMT600-P23 and SMT600-P38 membrane filtration modules as Alternative Filtration Technologies to meet the Colorado Primary Drinking Water Regulations requirements for Giardia lamblia and Cryptosporidium Removal*. This includes the requirement to keep a record of integrity test information, clean in place dates, filter maintenance and fiber repair results, and filter replacement dates. The direct integrity testing failure criteria shall be site and membrane specific and utilize the following decay rates. 1. Evoqua membranes – 4.47 pounds per square inch per minute (psi/min) based on a minimum starting direct integrity test pressure of 11.4 psi, design flow rate of 34 gpm, water temperature of 68 degrees Fahrenheit, and transmembrane pressure of 22 psi (per the calculations forwarded from Evoqua on March 1, 2017). 2. Scinor membranes - 1.93 psi/min based on a minimum starting direct integrity test pressure of 15 psi, design flow rate of 55 gpm, water temperature of 68 degrees Fahrenheit, and transmembrane pressure of 30 psi (per the "Pinewood Springs LRV Calculations" dated January, 2017).
Condition No. 3	The Department approved the addition of an ortho/polyphosphate blend (design basis: Aqua Smart, Inc., SeaQuest) for corrosion control on September 3, 2004. The approval is conditional based upon the following: ● The water system is to maintain an ortho/polyphosphate blend dosage of 1.0 milligrams per liter (mg/L); ● The District must monitor and record the use of the ortho/polyphosphate blend to assess the effectiveness of the corrosion control dose as well as its effect on the other water quality parameters. These records must be made available to the Division upon request; and ● The District must develop a standard operating procedure for the use of the ortho/polyphosphate blend. The standard operating procedure must include, but should not be limited to (a) detailed information associated with storage and handling of the product, (b) the implications associated with over-dosing, and (c) the effects of under-dosing.

Distribution System Details

Distribution System ID	DS001
Overall Distribution System Description	System pressure is maintained using a combination of booster pump stations and storage tanks. From the Clearwell for CT and Pump Chamber (040), finished water is conveyed to the low zone distribution system and tanks (024 & 038). Pump Facility 1 (030) conveys water from the low zone to the mid zone distribution system and tank (025). Pump Facility 2 (031) conveys water from the mid zone to the high zone distribution system and tanks (026 & 039). The Treatment Plant for Low Zone (035) can be used to boost the free chlorine concentration in the low zone tanks. The High Zone Chlorinator (003) can be used to boost the free chlorine concentration in the high zone tanks.
Minimum Distribution System Class/ basis	Class 1 – The population served is 3,300 or less.
Distribution System Appurtenances	Unknown
No. of Pressure Zones	3
No. of Distribution System Pump Stations	3
No. of Pressure Reducing Valves	2, only used when water needs to be supplied between pressure zones.
Typical Pressure Range	40 to 160 psi, as measured at the meter setters.
Flushing Protocol	Unknown
Deviations from Design Criteria	
	N/A
Conditions of Approval	
	N/A

Storage Tank Details

Tank ID/ Name	024 – Lower Zone Tank No 1
Tank Volume	500,000 gallon, welded steel tank
Operating Volume	Unknown
Tank Residence Time/ Turnover Info	N/A
Tank Appurtenances	Tank piping and appurtenances include an inlet pipe, overflow with 24 mesh noncorrosive screen, outlet pipe, and a manway access with a shoe-box style lid.
Deviations from Design Criteria	
	N/A
Conditions of Approval	
	N/A

Tank ID/ Name	038 – Lower Zone Tank No 2
Tank Volume	100,000 gallon, welded steel tank
Operating Volume	Unknown
Tank Residence Time/ Turnover Info	N/A
Tank Appurtenances	Tank piping and appurtenances include an inlet pipe, overflow with 24 mesh noncorrosive screen, outlet pipe, and a manway access with a shoe-box style lid.
Deviations from Design Criteria	
	N/A
Conditions of Approval	
	N/A

Tank ID/ Name	025 – Mid Zone Buried Steel
Tank Volume	20,000, below-grade steel tank
Operating Volume	Unknown
Tank Residence Time/ Turnover Info	N/A
Tank Appurtenances	Tank piping and appurtenances include an inlet/outlet pipe and a manway with a flanged style cover.

Deviations from Design Criteria	
	N/A
Conditions of Approval	
	N/A

Tank ID/ Name	026 – High Zone Tank No 1
Tank Volume	500,000 gallon, welded steel tank
Operating Volume	Unknown
Tank Residence Time/ Turnover Info	N/A
Tank Appurtenances	Tank piping and appurtenances include an inlet pipe, overflow with 24 mesh noncorrosive screen, outlet pipe, and a manway access with a shoe-box style lid.
Deviations from Design Criteria	
	N/A
Conditions of Approval	
	N/A

Tank ID/ Name	039 – High Zone Tank No 2
Tank Volume	100,000 gallon, welded steel tank
Operating Volume	Unknown
Tank Residence Time/ Turnover Info	N/A
Tank Appurtenances	Tank piping and appurtenances include an inlet pipe, overflow with 24 mesh noncorrosive screen, outlet pipe, and a manway access with a shoe-box style lid.

3.3 Plans
Water Conservation Plan

The system does not, and will not, sell over 2,000 acre feet of water annually; hence, this section is not applicable, and no copy of the Water Conservation Plan is required. However, it should be noted that the Pinewood Springs Water District's (PSWD) Water Main Replacement Infrastructure Project supports the goals of Colorado's Water Plan's collaborative water management three core values.

Core value 1; A productive economy in our community is built with a strong, vibrant, code complaint, and sustainable water main infrastructure. The aging and failing BRR water main compromises a productive economy in our community with the broken water main infrastructure affecting multiple areas including recurring, excessive, and costly repairs on leaks, causing pipe joints to break and valves to leak, excessive loss of water due to leaks, creating water outages and disruption to water services for our customers, creating issues for customers with continual breakdown of their appliances, water heaters, toilets, and other fixtures due to low psig (pounds per square inch gauge) pneumatic pressure.

Core Value 2; Being able to replace the BRR water main to resolve the recurring issues would provide an efficient and effective water infrastructure where PSWD would be able to provide the water service our customers deserve, and the district is responsible for and with bringing the water main up to code compliance in several areas.

Core value 3; A stable water main infrastructure on BRR would provide a strong environment for Pinewood Springs setting an example to be able to conserve our water resources and eliminate costly repairs respectfully and responsibly. In the past decade, mill levy funds and loans have provided the PSWD reservoir to be built to store water for the community and eliminate the issue of hauling water in the drought seasons. PSWD is a small entity with limited funds and are unable to replace the BRR water main infrastructure without additional funds through the WSRF grant or other sources unknown.

Pinewood Springs Water District
PNA

C2 local, regional and state plans – to do

Larimer County Water Plan
Larimer County is currently working on a Water Master Plan. Pinewood Springs is located in unincorporated Larimer County so in the county's jurisdiction for water planning.
The project started in late summer 2023, and it will continue through the end of 2024.
https://www.larimer.gov/planning/water#:~:text=Larimer%20County%20is%20currently%20working,check%20back%20frequently%20for%20updates.

Larimer County is taking foundational steps on strategic goals to:

- improve long-term planning for water supply in unincorporated areas, promote water-sharing strategies to preserve agriculture, and sustain water supplies,
- address risks and sustainability, and
- prepare responsive land use policies and standards.

The Water Master Plan will become an element of the Larimer County Comprehensive Plan and will help bolster the Larimer County's strategic planning for water, wastewater, and environmental flows. Keep in mind that Larimer County is not a utility provider, so the County may play specific strategic, coordinating, and collaborating roles to achieve water goals determined through the plan.

Last year as a precursor to the plan, Larimer County engaged a consultant, Brendle Group, to conduct the regional water Existing Conditions study and to facilitate work sessions and an open house to do initial visioning and goal setting. The Existing Conditions report and Executive Summary are below. The work from 2022 is foundational for the next stages of water planning.
Larimer County Water Existing Conditions Report (6/6/2022)
Larimer County Water Existing Conditions Executive Summary
Task 2 - Vision and Goals Memo
Attachment A - County Staff Work Session Summary
Attachment B - Stakeholder Open House

Colorado Water Plan
https://cwcb.colorado.gov/colorado-water-plan
The Colorado Water Conservation Board (CWCB) creates and manages the Water Plan framework, and supports the state's water community with funding and technical resources to implement programs and projects. The 2023 Colorado Water Plan was adopted by the Colorado Water Conservation Board in January 2023 and serves as a framework for statewide

collaboration around water planning. The Colorado Water Plan guides future decision-making and supports local actions to address water challenges with a collaborative, balanced, and solution-oriented approach that builds resilience. The Colorado Water Plan includes actions in four main focus areas that work together for a stronger state: Vibrant Communities, Robust Agriculture, Thriving Watersheds, and Resilient Planning.

References to infrastructure: (interesting that there is no reference to aging infrastructure in the executive summary)
Water Values: An efficient and effective water infrastructure system

Optimize investments in infrastructure and increase efficiency and conservation

Protect storage infrastructure from effects of wildfire, flooding, and debris flow

Stream and forest health improvements using nature-based solutions can support both the natural environment and existing water infrastructure and storage by building resiliency for drought, fire, and floods; reducing sedimentation; improving water quality; attenuating high flows; and enhancing groundwater recharge.

Loan application
8.5 Environmental Impacts
Describe direct and indirect impacts on floodplains, wetlands, wildlife habitat, historical and archaeological properties, etc., including any projected permits and certifications. (No more than 2,000 Characters)

> The proposed sites for this financial assistance application are located in pre-disturbed areas of existing water lines. No new areas will be impacted directly or indirectly. The Pinewood Springs Water District makes every effort to ensure minimal adverse environmental impacts during construction. The goal is to mitigate environmental impacts by avoiding, reducing and/or minimizing negative impacts and disturbances.
>
> Floodplains. The existing water line along Cree Court is located in a floodplain area (Larimer County Land Information Locator, Flood Map, https://maps1.larimer.org/gvh/?Viewer=LIL&%3Brun=Theme&%3Btheme=Flood%20Information). [insert exact location of impact on a map?]
>
> Wetlands. It does not appear that any work will impact existing wetlands in Pinewood Springs, according to the Colorado Wetland Inventory map.

https://csurams.maps.arcgis.com/apps/webappviewer/index.html?id=a8e43760cb934a5084e89e46922580cc
The Colorado Wetlands Inventory Mapping Tool is intended to assist in identifying wetland and riparian areas and provides only potential and approximate locations of the features mapped.

Wildlife habitat. Temporary disturbance of wildlife habitat may take place during construction periods (construction noise, equipment and supplies placement). However, it is expected that no wildlife habitat will be impacted permanently or for long periods of time. Every effort will be made to minimize impacts to wildlife during construction. Nesting birds, in particular, raptors can be protected by prohibiting construction in raptor nesting areas during the month April.
Construction will be conducted between 9:00 am and 7:00 pm to minimize noise disturbances for wildlife and residents.

Endangered species.

Historical, cultrual and archaeological properties. There are no known historical, cultural and archeological properties in the proposed construction areas for this project.

Materials. Pinewood Springs Water District will properly dispose of materials removed for replacement. Anything else about this that should be stated?

Pollution from construction equipment?

Direct Costs and Schedule Last Update: 10/31/2023

(1.) Button Rock (3,300 lf) - 16 meters, 3 hydrants

(2.) Wichita (2,220 lf), 23 meters, 1 hydrant

(3.) Cree Court (1,362 lf), 16 meters, 1 hydrant

(4.) Meadows to Cherokee (3,036 lf), 9 meters, 2 hydrants

(5.) Kiowa Hopi (2,290 lf), 27 meters, 2 hydrants

SRF

(1.) Button Rock (3,300 lf)

Detailed Budget Estimate

Date:	**10/31/2023**
Water Activity Name:	**Pinewood Springs Water District - Water Ma**
Grantee Name:	**Pinewood Springs Water District**

Infrastructure - Construction - Maintenance Project, replacing existing water main

(1.) Button Rock (3,300 lf) - 16 meters, 3 hydrants

Estimated working days for job length	28 days	
Estimated hours for job length		224 hrs
Estimated working days per Task-Week-Section	7 days	
Estimated hours per Task-Week-Section		56 hrs

aggregate cost - $83.00 * 3,300 lf	$	273,900.00	$	273,900.00
Proposal did not include; additional costs				
4" HDPE DR 11 pipe/ lf (1,500 lf)	$	7,500.00		
valve (1)	$	300.00		
meters (16)	$	36,000.00		
PRVs (16)	$	3,600.00		
hydrant (3)	$	2,676.00		
backflow connectors (16)	$	7,679.20		
	$	57,755.20		

Materials:	quantity		total
Fuel		$	1,600.00
Tools		$	800.00
Brass fittings		$	4,394.00
Connectors		$	4,394.00
4" HDPE DR 11 pipe/ lf - $5.00 lf * (3,300 lf)	3,300 lf	$	16,500.00
meters - $2,250.00 * (16 qty)	16	$	36,000.00
valves - $300.00 * (4 qty)	5	$	1,500.00
PRVs - $225.00 * (16 qty)	16	$	3,600.00
hydrant - $892.00 * (3 qty)	3	$	2,676.00
backflow connectors - $479.95 * (16 qty)	16	$	7,679.20
		$	79,143.20

Construction - Week 1 - Section 1 - (1.) Button Rock

(1.) Button Rock (825 lf) - 4 meters, 1 hydrant

Week 1 - Section 1; total hours	56 hrs
Week 1 - Section 1; total working days	7 days

Week 1 - Section 1; linear feet	825 lf

(3.) Cree Court (1,362 lf)

Detailed Budget Estimate

Date: **10/31/2023**

Water Activity Name: **Pinewood Springs Water District - Water I**

Grantee Name: **Pinewood Springs Water District**

Infrastructure - Construction - Maintenance Project, replacing existing water main

(3.) Cree Court (1,362 lf), 16 meters, 1 hydrant

Estimated working days for job length	28 days	
Estimated hours for job length		224 hrs
Estimated working days per Task-Week-Section	7 days	
Estimated hours per Task-Week-Section		56 hrs

aggregate cost - $83.00 * 1,362 lf	$	113,046.00	$	113,046.00
Proposal did not include; additional costs				
meters (16)	$	36,000.00		
PRVs (16)	$	3,600.00		
hydrant (1)	$	892.00		
backflow connectors (16)	$	7,679.20		
		$48,171.20		

Materials:	quantity		total
Fuel		$	1,600.00
Tools		$	800.00
Brass fittings		$	2,275.00
Connectors		$	2,275.00
4" HDPE DR 11 pipe/ lf - $5.00 lf * (1362 lf)	1,362 lf	$	6,810.00
meters - $2,250.00 * (16 qty)	16	$	36,000.00
valves - $300.00 * (4 qty)	4	$	1,200.00
PRVs - $225.00 * (16 qty)	16	$	3,600.00
hydrant - $892.00 * (1 qty)	1	$	892.00
backflow connectors - $479.95 * (16 qty)	16	$	7,679.20
			$63,131.20

Construction - Week 1 - Section 1 - (3.) Cree Court

(3.) Cree Court (340 lf), 4 meters, 1 hydrant

Week 1 - Section 1; total hours	56 hrs
Week 1 - Section 1; total working days	7 days
Week 1 - Section 1; linear feet	340 lf

Task 1 - Construction - Week 1 - Section 1 - (3.) Cree Court		
Fuel, Tools, Barricades Traffic Control	Est. Materials hours	Est. Labor hours
Fuel		
Tools		
Locate wire and slash tape		
Barricades traffic control
